>>> SUPPORTING PROGRESSIVE RESEARCH

INSTRUMENTS & LAB ESSENTIALS

www.proteogen.com

OUR VISION:

- ✓ To be one of the best Life Science solution providers by delighting our customers, partners & employees and be the best managed company in the market that we serve.

OUR MISSION:

- ✓ Strive to continuously improve our professional service to customers by innovating and bringing new solutions to the market.
- ✓ Continuously improve team proteogen capabilities & knowledge.
- ✓ Provide progressive Leadership for the Research community's needs.

OUR CORE VALUES:

- ✓ Integrity : We adhere to high ethical standards.
- ✓ Respect : We value diversity and treat each person in a manner that reflects our values.
- ✓ Commitment : Keep up our promises and perform our roles to the highest possible standards.

Dear Customer,

At the onset we would like to thank all our customers for continuing to use our products and services for many years and please be assured that Proteogen would continue to Innovate and introduce Quality products and services in the Market.

We will strive to provide broader Laboratory workflow solutions to our customers and to meet ever demanding needs of our users. We are also pleased to introduce acceptable quality Bench Top Equipments including SDS Page Electrophoresis, Submarine Electrophoresis, Power Supplies, Blotting Apparatus, Vortex Mixture, Magnetic Stirrers, Rockers, Centrifuges, Hybridization Oven, Shakers, Dry Bath, Water Bath etc.

Through these new product introductions, we are committed to meeting ever increasing user needs. In our constant effort to stand by our motto of “Supporting Progressive Research”, we are committed to bringing Newer Solutions, Technologies and Products to the Market without losing focus on providing these products as affordable as possible.

PAPER ELECTROPHORESIS SYSTEMS

Basic unit consists of anode and cathode buffer reservoirs capable of accommodating suitable electrode assembly. In case of vertical model paper, supporting vertical stands with cross rod's are provided in between Reservoirs, whereas a removable horizontal supporting stand has been provided in horizontal model, in both the cases transparent acrylic covers are provided for controlling buffer evaporation and for electrical safety.

Paper Electrophoresis is a conventional technique of protein analysis in clinical medicine. Certain blood cancers like myeloma and sickle cell anemia are diagnosed by this method.

SUBMARINE ELECTROPHORESIS SYSTEM

The most efficient way to separate DNA Fragments in Agarose Gels is by Submarine Electrophoresis. In this technique, the entire gel is submerged in the buffer.

There are different types of models for different applications like Mini, Midi, Maxi, Maxi XL, Maxi XXL etc to resolve 4 to 100 samples at a time. Every system has been devoted to achieve maximum efficiency in terms of low buffer consumption, fast run and better separation.

VERTICAL SLAB GEL ELECTROPHORESIS SYSTEM

Poly Acrylamide Gel Electrophoresis (PAGE) in slabs is a widely used technique. Molecular Size of Polypeptides can be determined by SDS PAGE. They can be transferred on to membranes for antibody detection.

We offer a broad range of vertical slab electrophoresis systems, suitable for a wide variety of modern electro phoretic techniques. The MINI model answers the demand for small, conventional electrophoresis unit for fast, high resolution protein separations in 8 X 7 cm gel. The REGULAR Model is used for electrophoresis in 16 X 14 cm gel. The DUAL models are versatile ones for running two gels, under similar conditions simultaneously. Gels can be cast in three different techniques with GEL CASTING UNIT, available for all MINI, REGULAR and DUAL models.

BENCH TOP COOLER

Cooler is a thermal container ideal for low temperature storage. It is ideal for storage of restriction enzymes, nucleic acids and other biochemical or biological samples, requiring sub freezing temperatures. It replaces the conventional ice box.

It helps to maintain temperature stability for samples stored in the freezer during handling or power failure.

It maintains sub-zero temperatures up to 3 hours, when used on the benchtop at normal room temperature. It eliminates numerous trips back and forth to the laboratory freezer.

It may also be used to freeze mammalian and insect cells prior to low temperature storage.

Two sizes, 12 or 24 tube storage modules are available for 1.5 ml or 0.5 ml standard size conical tubes.

ELECTROPHORESIS POWER SUPPLIES

We have a wide range of power packs for electrophoresis starting from 50 Volts to 500 Volts, which Operates in constant voltage and constant current With Digital Display for Current, Voltage and Timer indications. Customer Can Choose the Different range of power supplies according to their requirement.

SEMI DRY BLOTTER

We also manufacture Semi Dry Blotters to save buffer. Blotting is rapid and efficient too. They are available in mini as well as regular sizes. Imported graphite electrode is used.

These Semi Dry Blotters offer rapid transfer time for DNA, RNA and protein blotting. All units can be used for all types of blotting and are compatible with gel thickness from 0.25 up to 10 mm without the need for additional equipment. Each unit is compatible with their respective vertical gel system.

These Semi-dry blotters utilize a screw down lid, which secures the blot sandwich and allows complete control of pressure ensuring even transfer.

Specification:

Name	Semi Dry Blotter Size (10cm x 10cm)
CAT#	PHS-SD-001
Size	Mini, 10 x 10 cm

Working Area	W x D x H(335 x 265 x 200)mm
Outer Dimension	W x D x H (340 x 290 x 330)mm
Additional part	Camera

Name	Chiller -3 L
Cat#	PHS-MC-005
Temperature Range	4 °C
Temperature Controller	Microprocessor Digital PID Temperature controller cum Indicator
Accuracy	+/- 1 °C
Temp. Stability	+/- 1 °C
Sensor	PT100 Sensor
Bath Volume	3 Ltrs
Flow rate	9 Ltrs
Pump Type	Chemical resistant magnetic pump
Circulating Pump	Circulating Pump to circulate liquid /water to an external source in closed loop condition
Load / Outlet	3 Outlets in Series/Parallel
Level Indicator	Front panel scale provided for minimum & maximum water level indication
Water Filling	Automatic with float level sensor
Inner chamber	Stainless steel
Outer chamber	Stainless steel powder coated
Power Supply	230V/50Hz/AC

Corning® Cell Counter

CORNING

Accurate Cell Counts in a Flash

For years, the choice between manual and automated cell counting has been a difficult one. Manual cell counting, on the one hand, is accurate, but time-consuming and very user-dependent. Automated cell counting, is much faster and less user-dependent, but the cost of disposable counting slides can be an issue. A tough choice, but now there is a solution.

The new Corning Cell Counter is the first automated cell counter that combines the best of both worlds. It is:

- ▶ **Fast** – thanks to its online image processing
- ▶ **Accurate** – thanks to its cloud-based machine learning algorithm.
- ▶ **Low-cost** – works with common reusable glass hemocytometer. No consumables required.

Three-second Cell Counts

The Corning Cell Counter can perform a single cell count in less than three seconds*. This is much faster than most automated cell-counting systems. With traditional systems, the image analysis algorithms must be processed on a relatively small onboard computer. The Corning Cell Counter, utilizing the CytoSMART™ Cloud App, can process the images in the Microsoft Azure Cloud Computing Platform. This cloud computing ability means that it can analyze the images faster than any existing onboard processor can.

Higher Accuracy

The Corning Cell Counter uses a sophisticated Deep Neural Network for cell detection. This state-of-the-art image analysis software allows for optimal accuracy. When Trypan Blue is added (Figure 1) the system can also detect cell viability. The Corning Cell Counter can detect clusters of cells, which leads to accurate cell counts of “highly concentrated samples” (up to 1×10^7 cells/mL; Figure 2).

Low Cost Like Manual Counting

This Cell Counter works with the provided counting chamber or customer supplied hemocytometers, enabling users to enjoy the benefits of automated cell counting without the cost of disposable slides.

Easy to Use

The Cell Counter is easy to use. Simply connect the Cell Counter to your computer or tablet and start the CytoSMART Cloud App. Place the loaded counting chamber on the stage. Focus on your cells and press the Count button. The simplicity of the Cell Counter allows anyone working in your lab to easily count cells without the need of extensive training.

Figure 1. Dead cells stained with Trypan blue are detected by the image analysis algorithm. Red circles represent dead cells, green circles represent live cells.

Figure 2. The image analysis algorithm is able to detect clusters of cells. Red circles represent dead cells, green circles represent live cells.

*Measured using a 73 Mbps download speed and a 20 Mbps upload speed. Actual speed can vary depending on the internet connection.

Accessible Data Anywhere, Anytime

The Corning® Cell Counter instantly generates a report containing the counted cell concentrations and viability and also the image of the counted sample with the counted cells (live and dead) clearly indicated.

This is an improvement over traditional automated counting systems, in which reporting is hampered by three factors:

1. Onboard computers are so small that it takes a very long time to generate a report.
2. Screen interface is of low quality to clearly see what has been counted as live vs. dead cells.
3. Data can only be exported using a USB stick, which can be a hassle.

With the Cell Counter, the report is instantly shown on your computer and sent to the CytoSMART™ Cloud App, enabling you to look up the analyzed image and cell count on your smartphone, tablet, or computer. Since all data is saved in the CytoSMART Cloud App, you can gain insight into the health and quality of your cell culture from one experiment to the next.

Specifications

Counting range	5 x 10 ⁵ to 1.0 x 10 ⁷ cells/mL
Counting range	10 to 70 μm

ABDOS PIPETTES

ABDOS Pipette meets the highest needs in precision and accuracy – combined with ultimate ergonomics and increased flexibility with sophisticated blend of feature and functionality. It is easy to calibrate and maintain with tools supplied. The operator manual included in the pack provides complete information on recalibration and maintenance of the pipette.

1 Comfortable Finger Support:

helps in prolonged pipetting operation with less fatigue.

2 Easy Calibration:

Calibrated accordance with ISO8655. Each pipette is supplied with individual control certificate.

3 Ejector:

Very low operating force and position in such a way that thumb strain is reduced when moving to eject tips.

4 Display:

Clear and easy read display with large numbers and precise increment.

5 Slim Pipette Shaft:

Allows Pipetting into narrow vessels.

6 Tip Cone:

Optimized Standard Design. Pipette tips from ABDOS and other manufacturer's tips can be used.

7 Fully Autoclavable

without disassembly with steam Sterilization at 121°C, 1atm for 20 minutes. Does not require any special preparations.

8 Premium Pipette

with lower part autoclavable to ensure contamination free operations.

Transferpette® S

Genuine one-hand operation -
set and lock volume, pipet, eject

Distinct precision and
effortless operation

Volume-change protection
for safe pipetting

Transferpette® S single and multichannel pipette

Precise and easy to use – the Transferpette® S microliter pipettes provide all features required for pipetting in Life Science applications! By using innovative materials, the Transferpette® S pipette has become a perfect manual pipette for demanding laboratory applications.

- Effortless one-handed operation set – and locking the volume, pipetting, ejecting – all without shifting hand position!
- Clearly visible volume display – 4 digits for precise setting. Always visible, even while pipetting.
- Completely autoclavable at 121 °C (20 min) without disassembly.
- Calibration adjustment with the Easy Calibration technique.

Transferpette® S – the result of intensive ergonomic and operational studies

The genuine one-handed operation including volume adjustment for right and left-handers, as well as the reduced weight ensure easy and efficient pipetting in every volume range.

The short 12.5 mm stroke reduces the risk of RSI (Repetitive Strain Injury). This makes the Transferpette® S a very pleasant, reliable pipette with respect to its features!

The particular advantage of the multichannel pipette is easy operation, e.g., when performing serial pipetting of immunological assays, while making serial dilutions, or when filling 96-well plates for cell cultures. The perfect complement to the Transferpette® S single-channel pipette!

More features

- Large, central pipetting button and separate ejection function
- Volume-change protection
- Corrosion-resistant pistons and ejector
- Color-coded volume range
- Transferpette® S 0.1 - 1 µl – highest precision for small volumes in molecular biology, especially for pipetting enzymes.
- 3-year warranty for single-channel pipettes
- UV resistant
- CE-**IVD**-compliant

Transferpette® S

Volume range:

The Transferpette® S pipette provides maximum versatility and optimum quality over the entire volume range.

There are 10 adjustable-volume single-channel pipettes and 9 fixed-volume single-channel pipettes available in the 0.1 µl to 10 ml range.

Transferpette® S-8

There are 5 sizes of multichannel pipettes available in the 0.5 to 300 µl volume range.

A perfect team with pipette tips by BRAND

BRAND pipette tips and filter tips fit perfectly on the Transferpette® S and many other pipettes.

The tips are manufactured from high-quality materials in a state-of-the-art cleanroom in Germany. Thus, all racked tips and

filter tips up to 1000 µl are free of DNA (<40 fg), RNase (<8.6 fg), endotoxins (<1 pg), and ATP (<1 fg), and ensure contamination-free work.

BRAND offers a full tip system for any application requirement.

Slim!
If the tip fits in the vessel, so does the shaft – no retrofitting necessary!

Maximum compatibility!
The tip cone design offers excellent fit with pipette tips from BRAND and broadest compatibility with tips from most other manufacturers.

Fast!

One-handed volume setting for both right- and left-handed users – even with gloves!

Effortless!

Ergonomically arranged tip ejection button with color code according to volume range.

Maximum protection!

Completely autoclavable at 121 °C (20 min) without disassembly – for maximum protection from contamination!

Low strain!

Special O-rings made of silicone / FKM and the stepped design of the tip ejector reduce attachment and ejection forces.

Individual shafts and seals of the multichannel pipette Transferpette® S-8/-12 can be easily unscrewed (patented) and easily cleaned or replaced. Saves cost and downtime!

THE RIGHT LATEX-FREE GLOVE FOR EVERY PROCEDURE

Our full line of Nitrile Exam Gloves provides barrier protection against strikethrough of blood and other potentially harmful fluids. These durable gloves provide the fit and feel without the risks associated with latex-related sensitivity or allergy.

- **PURPLE NITRILE* Exam Gloves:
Maximum Protection For Higher-Risk Procedures**

PURPLE NITRILE* Exam Gloves are frequently the glove of choice for healthcare workers who need outstanding barrier protection from bacteria, viruses and chemicals during procedures where risk of fluid exposure is moderate to high. PURPLE NITRILE* gloves offer the highest level of chemotherapy protection available in Halyard's line of nitrile exam gloves. These durable gloves are available in 9.5 and 12-inch lengths, for maximum coverage and protection. PURPLE NITRILE* Gloves are especially appropriate in dealing with unknown risks.

- **STERLING* Nitrile Exam Gloves:
The Worry-Free Choice For Virtually Every Task**

STERLING* Nitrile Exam Gloves were specifically designed to fit and feel like latex, with excellent comfort and tactile sensitivity. They provide durable barrier protection in situations where expected fluid exposure is low to high. These gloves are available in 9.5 and 12-inch lengths, for maximum coverage and protection. Most STERLING* Nitrile Exam Gloves are cleared for use in chemotherapy. If you want to standardize on one exam glove that can fit virtually all your needs facility-wide, STERLING* Nitrile is the glove to choose.

- **LAVENDER* Nitrile Exam Gloves:
Affordable Nitrile Protection And Comfort**

LAVENDER* Nitrile Exam Gloves are thinner, lighter, and more economical than standard nitrile, yet they retain the protective properties required for excellent performance across a wide range of healthcare tasks. They're the ideal replacement for vinyl and latex exam gloves, providing a superior barrier and more comfort than vinyl, while avoiding the problem of latex allergy, all at an affordable price.
